

FOR PUBLIC RELEASE
10 May 2005

ALBUQUERQUE, NM – K&A Wireless, LLC (<http://www.ka-wireless.com>) announces the appointment of K&A into EXIT Realty's preferred vendor program. EXIT is one of the most dynamic real estate franchises and is continually looking for new ways to help their franchisees get more listings and sell more homes to be successful in the grueling, highly competitive real estate market. K&A's EYE-View™ system allows the realtor to transmit video images of a home across the internet, to a remote client, in real time, using a simple camcorder and a wireless link. EYE-View™ is ideal for relocation and hot housing markets, where **TIMING IS EVERYTHING**, and is a key Internet-based marketing tool that is becoming a total image management system. "We are very excited with the opportunity to work with and help the EXIT Realty group. We have a unique capability that will set them apart in the market and give them a sustainable competitive advantage, which we think is most difficult to achieve as a realtor..." said Kamil Agi, President-CEO of K&A Wireless. After seeing K&A's EYE-View in action, I believe this system will create an exciting level of live interaction with out of town buyers. Here is another fine example of leading edge technology available to EXIT agents and brokers..." said Reinder Kuntz, Vice President of Graphics and Ancillary Services.

For more information on EYE-View, please go to <http://realtors.eye-view.com>.

Top realtors are always asking, "How can I be more productive and sell more homes?" "How do I get more listings?" and "How can I gain access to more buyers and sellers?" ----What they have found is that the effective use of the Internet, and technology, is an effective way to improve productivity, attract buyers and sellers and obtain the competitive advantage.

EYE-View is a portable real-time video solution for Real Estate. It can be deployed on-demand, allowing an on-site real estate professional or homeowner to provide a client with a real-time video tour of a property over the Internet. Unlike virtual tours, the EYE-View allows the agent to get direct feedback from the prospective client during the tour, while continuously selling the home to the client. An EYE-View operator provides real-time video to a client-viewer who could be a customer, another agent, a builder or even an inspector. The client-viewer directs the operator to show the video images in detail, over the Internet, while in contact with the operator of the camera over the telephone. EYE-View provides everything necessary to provide unlimited customized property showings to a remote client while interacting with that client. EYE-View is easy to set up and use and we provide a level of customer service unmatched in the industry to those offering this capability.

Features

- Real-time tours over the Internet with direct feedback between client-viewer and camera operator using existing wireless infrastructure including cellular.
- Video in/Video out for recording and uploading video tours for multiple viewings on web site.
- Produce virtual tours with camcorder when wireless infrastructure is not available and play them on-demand to clients over the Internet using the EYE-View system.
- Ability to create still photos of property for web sites and MLS listings.

ABOUT THE COMPANY

K&A Wireless, LLC designs, develops and manufactures the wireless and IP technologies and products that bring a new immediacy and capacity to capture video information. We help clients improve their performance in mission-critical tasks and operations by acquiring video *from* anywhere and sending it *to* anywhere.

Contact K&A with your specific needs by phone at (505)338-2380, fax at (505)338-2382, or e-mail sales@eye-view.com and ask for an EYE-View specialist.
